SAYS OIL TRUST MEN ACTED AS IF CRAZY

NEW YORK, Nov. 11.—George W. Barnes, the Oklahema oil producer, testified today in the government's suit to dissolve the Standard Oil company that the Prairie Oil and Gas company, a Standard Oil cubeldiary and rival of the Texas Pipe Line and the Gulf Pipe Line companies entering the Oklahoma fields from the south, had started to extend its pipe line to the Oklahoma Glenn Pool section, but because of an adverse official ruling had suspended work. Counsel for the Standard Oil read the regulation under which a pipe line may be built through government land contingent upon the consent of the secretary of the interior, who also has the right to suspend the license at any time for cause. Mr. Barnes said.

"I consider a man who would build a line under such conditions which make it likely to be taken away from him at any time, a fit subject for an insan asvium. What company would spend millions building a line subject to the whim of the secretary of the interior, who might suspend the license any time he got billous?

Mr. Barnes said that the producers had suffered much through a lack of pipe line competition.

"Our only competition is in selling the oil," he said.

He declared that 30 per cent of the producers were favorable to the Prairie company, as it had been their friend.

SPRINGS SENSATION IN LAND-GRAFTING CASE

. FRESNO, Cal., Nov. II.—United States Pistrict Attorney Lawler created a sensation in the federal court today when he attempted to introduce evidence in the case of the government against S. C. I'llis to prove that the defendant, after building thirty-five miles of foncing surrounding 30,000 acres of government land and also his own holdings, spent thousands of dellars in an attempt to secure the entire acreage by illegally locating his vaqueros upon the property. The evidence was uneartied only two days ago, although Lillis was indicted three years ago for inclosing government lands. The property is in the Cantua district, about fifty miles southwest of this city. The newly-discovered alleged frauds were perpetrated in 1996, and the statute of limitations bars prosecution of those charged.
